EXPERIENCE

Software Engineer | Replai | Porto, Portugal | Apr 2020 – Present

- Working on a startup to build new technology that generates AI-driven short-videos to engage sports fans by automatically and quickly picking the best moments from a live stream.

Software Engineer | Feedzai | Porto, Portugal | Aug 2018 – Apr 2020

- Helping achieve customer success, adapting the company's product to the necessities of each client.
- Main activities: Java development, requirements discussion, technical design, technical leadership and DevOps.

Software Engineering Intern | Bosch Car Multimedia | Braga, Portugal | Feb 2018 – Jul 2018

- Worked on my master's thesis under the topic "Thermal imaging for vehicle occupant monitoring".
- Published article "Face Detection in Thermal Images with YOLOv3" in ISVC 2019.

Software Engineering Intern | Armis | Porto, Portugal | Jul 2017 – Aug 2017

- Implemented a map visualization module and a business intelligence solution for a new product.

Teaching Assistant | Faculty of Engineering of the University of Porto | Porto, Portugal | 2016 - 2017

- Helped teaching multiple courses: Programming; Graphical Applications Laboratory; Computer Graphics.

EDUCATION

Faculty of Engineering of the University of Porto | Porto, Portugal | Sep 2013 - Jul 2018

BSc (3 years) + MSc (2 years) in Informatics and Computing Engineering

Final grade: 18 out of 20

Facultat d'Informàtica de Barcelona | Barcelona, Spain | Sep 2017 - Jan 2018

Erasmus+ exchange programme. Topics studied: Deep Learning; Concurrency and Parallelism; Virtual and Augmented Reality; Intelligent Data Analysis Applications in Business; Constraint Processing and Programming.

PRESENTATIONS

- Multiple participations in "Semana Profissão: Engenheiro" and in "Mostra U.Porto" presenting my projects.
- Lectured a C++ workshop (Oct 2016), a Python workshop (Feb 2017) and a session on Security (Nov 2018).
- Presented technical details of security vulnerability CVE-2018-13342 at an 0xOPOSEC meetup and SINF'2019.

SKILLS

- Technical tools:
 - Databases: Oracle Database, PostgreSQL, Cassandra, SQL Server, MySQL, SSIS, SSAS, PostGIS
 - Languages: Java, C/C++, Python, HTML, PHP, CSS, JavaScript
 - Frameworks: Node.JS, Keras, Angular
 - Others: Git, Slack, Docker, Ansible, RabbitMQ, Maven, Travis CI
- Cambridge Certificate in Advanced English (Level C1).
- Completed a course on Machine Learning by Stanford University on Coursera.
- Certified ScrumMaster® (Sep 2018 - Sep 2020).
- Oracle Certified Professional, Java SE 8 Programmer.

EXTRACURRICULAR

- Held the role of CEO in a simulated company with real clients, managing a multidisciplinary team of 40 students, as part of a course named "Project Management Laboratory" – www.musaic.ml
- Scrum master of the team behind a website and mobile app for a non-profit organization – www.cuidadores.pt
- Co-organized JobIT'18 and volunteered in Web Summit 2016, ENEI 2018 and Commit Porto '18.
- Competed in the EBEC Challenge, BEST SciTech (2nd place), Porto Summer of Code, Google HashCode (306th place – 4th best of Portugal) and Make or Break 2018 (1st place).
- Member of NIAEFEUP (Jan 2016 – Jul 2018) – helped in events, workshops and automation projects.
- Security researcher as a hobby, with some of my discoveries documented in my blog – gustavosilva.me/blog
